### PAB1083: 2019 SOFTAIL FXDR 114 - ERGONOMIC ALTERNATIVES

#### **Purpose for Parts and Accessories Bulletin**

Harley-Davidson has evaluated the ergonomics of the FXDR™ 114 and has identified alternatives to the stock riding position for riders looking for a more relaxed position. There are three options for these customers including a handlebar, a seat, and an air cleaner.

Harley-Davidson has developed a handlebar fitment that gives customers an alternate hand position that is 58 mm (2.3 in) closer to the rider. Harley-Davidson has also recently launched a Reach Seat for FXDR 114 that moves the rider 32 mm (1.26 in) closer to the hand and foot controls. Combining both can give a total of 90 mm (3.54 in) reduction in reach to the hand controls. In addition, changing out the stock intake for a Screamin' Eagle® Ventilator Air Cleaner Kit will provide even more room for the rider's right leg.

FXDR 114 was designed with an aggressive rider position targeting riders from 1.75–1.9 m (5 ft 7 in - 6 ft 2 in). For riders below and on the lower end of this range or riders looking for a more upright riding position, one or more of these options will reduce reach and improve comfort and confidence.

#### **Markets Affected**

All markets are affected.

#### **Summary**

##### **Reach Seat**

The **new** Reach Seat for FXDR 114 (Part No. 52000398), is now available for purchase.

##### **Screamin' Eagle Ventilator Air Cleaner Kit**

(Part No. 29400298) Gloss Black

##### **Fat Drag Handlebar**

The following parts can be purchased to enable the **new** hand position for 2019-Later FXDRS: Refer to Table 1.

Table 1.

Description	Part No.
Handlebar - Fat Drag	55977-09A
Riser and Clamp Kit	55900123
Upper Clutch Cable	37200375
Brake Lines, ABS - UPPER	Stock
Brake Lines, ABS - LOWER	Stock
Bolt, Riser Mount (1/2"-13 thd x 2.75" lg) (qty 2)	3471
Washer, Split Lock (1/2" nom) (qty 2)	7068
Cup Washer (qty 4)	56159-73
Rubber Isolator (qty 4)	56161-83A
Isolator Sleeve (qty 2)	56163-93
Switch Wire Extension (18")	69201794
Twist Grip Sensor Extension (18")	69201804
LH Grip	Stock 56248-08
Wiring Boot / Steer Head Cover	69201700
Cable Strap (for bundle at steer head)	10006

### **Handlebar Installation**

See the instruction sheets included in the kits as well as the vehicle service manual for installation instructions.

- -J04796 – Fat Drag Handlebar
- -J06477 – Riser and Clamp Kit
- -J06453 - Upper Clutch Cable

### ***NOTE***

*After installing new mirrors, handlebars, wiring, or control cables/lines, and before operating the motorcycle, check to ensure that all controls are fully functional and that the mirrors provide the operator a clear view to the rear. Handlebar height is regulated in many areas. Check local laws before installation.*

### **Questions**

Contact Technical Service with any concerns regarding application. Direct all other questions to the Dealer Services Representative.
