Instructions for setting V-Rod Model clocks

SETTING THE CLOCK:
2005 and 2006 VRSCSE (No 12/24 hour clock option)
Clock set button is located just aft of the horn below the left side frame rail.

1. Turn the ignition switch ON.

2. Press and hold the clock-set button for five seconds until the last digit of the minutes display on the clock begins to blink. Release the button.

3. Press and release the clock-set button repeatedly to advance the last digit of the minutes display. Each time you press and release the button, the display will advance one minute.

4. When the correct minute is displayed, press and hold the clock-set button for five seconds, the minutes display will switch to the first digit of the minutes display.

5. Press and release the clock-set button repeatedly to advance the first digit of the minutes display. Each time you press and release the button, the display will advance one minute.

6. When the correct minute is displayed, press and hold the clock-set button for five seconds, the minutes display will switch to the hours display (both digits).

7. Press and release the clock-set button repeatedly to advance the hours display. Each time you press and release the button, the display will advance one hour.

8. When the correct hour is displayed, press and hold the clock-set button for five seconds, then release. The hours display will stop blinking, indicating that the clock has been set.

9. Turn the ignition switch OFF.

SETTING THE CLOCK:
2006 VRSCA, VRSCD, 2006 VRSCR
    Post 2006 model launch
    First launch of 2006 VRSCR (2005.5) model does not have clock feature
